Karelia 
BERRIES
Nature cares about you

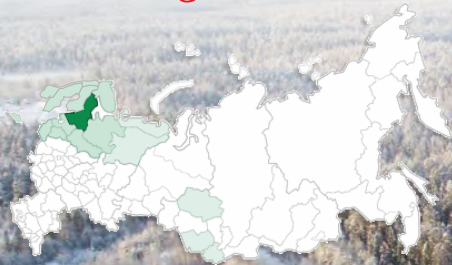

Karelia Berries LLC is one of the largest players on the European market of IQF berries and products of advanced processing.

We are the processors of a full cycle from the forest to the shelf

Karelia Berries process more than
8 000 tons
 per year increasing volume by
30%

The factory is located on the territory of
40 hectares
 with facilities that let keep up to
25 000 tons
 of product.
 There are 8 unique production lines by leader equipment manufacturers at the factory.

We sell products
in wholesale package
 for food companies and HoReCa sector.

Our products
in retail package
 are available under Karelia BerriesTM and FromBioTM and under different trademarks of our partners and chain stores.

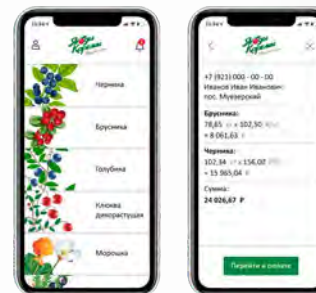

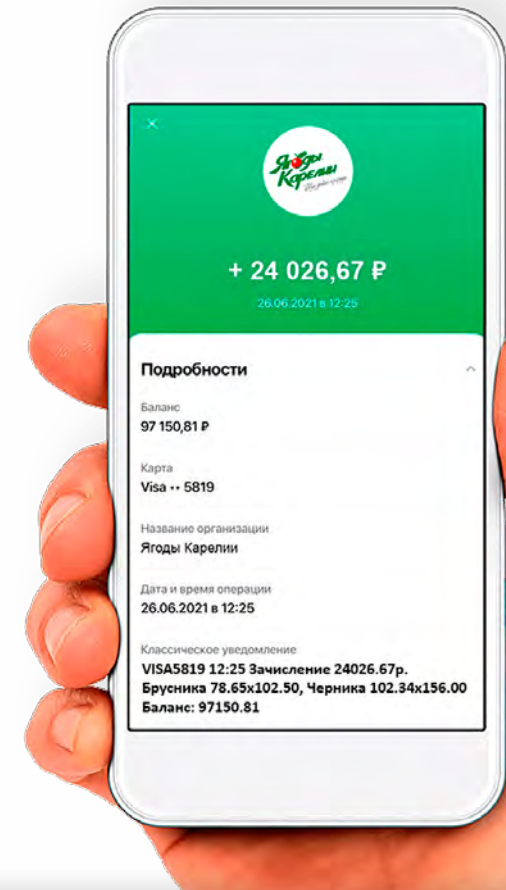

OUR MAIN SUPPLIER - OVER 30 THOUSAND PICKERS COUNTRYWIDE

We buy wild berries directly from pickers

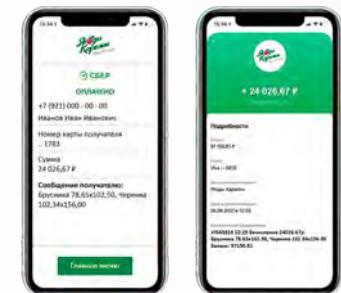

Data for the 2022 season:

- 100% cashless payments
- > 30 thousand active pickers
- > 70 thousand transactions
- > 5000 pickers installed mobile app
- > 2000 wild harvest sites on the map

STEP 1

The receiver selects the names of wild plants, indicates the weight, price and brings in the picker's mobile phone. The system determines the picker by phone number and offers to proceed to payment. If the picker is not yet in the database, you will need to fill in the data once.

STEP 2

Payment for wild plants is carried out on Sberbank cards and any other banks. No transfer fees from the picker is not withheld. Instant transfer of money to the picker's card. The receiver sees the success of the operation. The picker sees a notification from the bank.

Founders and employees of our company keep a healthy lifestyle and we are convinced that only the highest quality of products and refusal from using any chemical and artificial additives ensures health benefits for our consumers and success of the company. We do not treat this question as an advertising tool or trick. We process only the northern berry that grows in tough taiga climate, so we believe it embodies all the benefits of Nordic nature.

QUALITY

Quality and safety are fundamental for our work. In order to maintain customers' trust we thoroughly control all the way of the primary products that are to be processed into final products. Requirements specified for the primary products meet European standards of quality. Production facilities of the company are equipped with the most up-to-date technological, production and packing gear. We own an industrial-warehouse complex and vehicle fleet, freezers equipped properly for safe storing and transportation. We develop the processing technologies in accordance with the certified Food Safety Management System FSSC 22000.

HEALTHY LIFESTYLE

Founders and employees of the company live a healthy lifestyle. We believe that high quality of our products with null content of any chemical or artificial additives is essential condition for health of our customers and guarantee of the company's success. It's not an advertising trick. We process only northern berries that were getting ripe in tough taiga climate and thus imbibed all the favors of Nordic nature and vitamins.

OUR BERRIES ARE RADIATION-FREE

We pay specific attention to radiation background control and we don't purchase berries and mushrooms that grow on lands of Belarus and Ukraine contaminated by radiation. We are not ashamed to supply our Scandinavian radiation-free berries to kindergartens.

TOTAL TRACEABILITY

Frombio Oy carefully follows the principles of transparency and process flow. We developed, implemented and work with automatic system of production records. The system allows us to identify the supplier, the date of purchase, the date of freezing, the date of production and the responsible person for each item of production (bag, box, package) using its unique number. The system also lets us trace the whole production process — beginning with acceptance of berries and finishing with final delivery to the customer. The system of production records is another way to guarantee the quality of our products.

OWN CERTIFIED LABORATORY

The company has own certified laboratory that helps to maintain the highest quality of our products by examining and doing research work on materials and our products. Longstanding cooperation with the scientific research laboratory of one of the Agrarian University gives us a chance to develop and introduce new technologies and innovations into new types of berry products.

INNOVATIVE TECHNOLOGIES

Frombio Oy studies innovations and introduces cutting-edge technologies into berries processing. We keen to keep the values presented by nature and let our customer feel them.

ORGANIC

We cooperate with control organizations and we can offer our unique organically certified products.

RESPONSIBILITY

For Frombio, responsibility is a comprehensive method of operation which ensures the continuity of operations and sustainable development. We follow the social responsibility guidance provided by the ISO 26000-standard.
